

# RETINAL/IRIS SCANNERS

MAX MEINERS

# DIFFERENCES & SIMILARITIES

Category	 Iris Scanning (Biometric Modality)	 Retinal Scanning (Biometric Modality)
Extremely fast and reliable search results	✓	✓
Uses safe, low energy-infrared light for scanning (same as what is used in TV remote controls)		✓
Uses a digital camera to capture the image	✓	
Has absolutely no negative impact on human health	✓	✓
Ability to save biometric images for auditing purposes	✓	
Ideal for large databases	✓	✓
Completely contactless	✓	✓
Measurement accuracy affected by disease		✓
Requires close proximity to camera for successful scan		✓

THE  
END

A stylized graphic featuring the words "THE" and "END" in a bold, bubbly font. The word "THE" is cyan and "END" is magenta. A cyan hand icon is integrated into the letter "H" of "THE". The entire graphic is set against a black rounded rectangle, which is centered on a blue gradient background.
