- Use Streamlit instead of Power BI as it is more efficient.
- instead of keeping all datasets in separate CSV files, we could create a database to store them.
- construct the datasets into the same formats to make it easier to manage
- Implement processes to identify and rectify data errors, ensuring data is accurate, complete, consistent, and relevant.
- Include the time spent on a task
- We went from 1 meeting a day to multiple meetings as it boosts team morale and communication.
